प्रिय पाठकों,

कृत्रिम बुद्धिमत्ता (आर्टिफिशियल इंटेलिजेंस) और डिजिटल शिक्षा भारत के शैक्षिक परिदृश्य में एक नए युग की शुरुआत कर रही है, जो ज्ञान प्रदत्त करने, उस तक गम्यता और अनुभव के तरीके को परिवर्तित कर रही है। इससे संवर्द्धन शिक्षार्थी और शिक्षकों दोनों के लिए अभूतपूर्व अवसर प्रदत्त हो रहे हैं। विशेष रूप से एआई व्यक्तिगत शिक्षण में क्रांति ला रहा है, जिससे छात्रों को अपनी जरूरत अनुसार विषय-सामग्री को समझने की अनुमति मिलती है, जो व्यक्तिगत शिक्षण आवश्यकताओं के अनुरूप अनुकूली एल्गोरिदम द्वारा निर्देशित होता है।

भारत जैसे विशाल और विविधतापूर्ण देश में, ऐसी प्रौद्योगिकी में दीर्घकालिक शैक्षिक समरूपता निर्माण को समावेशी करने की क्षमता है। अनुकूलित शिक्षण अनुभव और मापदंड वाले डिजिटल समाधान प्रदत्त करके, एआई यह सुनिश्चित करने में मदद कर रहा है कि, दूरदराज और वंचित क्षेत्रों सहित सभी सामाजिक-आर्थिक पृष्ठभूमि के छात्रों की गुणवत्तापूर्ण शिक्षा तक गम्यता हो सके। जो कभी असंभव सा प्रतीत था, वह अब सर्वसुलभ- सर्वस्व अधिक न्यायसंगत, समावेशी और गतिशील शिक्षण वातावरण प्रदत्त कर रहा है। पहुंच से परे, ये उपकरण रचनात्मकता, आलोचनात्मक सोच और तकनीकी साक्षरता जैसे 21वीं सदी के आवश्यक कौशल को भी बढ़ावा देते हैं, जिससे भारत के युवाओं को तेजी से प्रतिस्पर्धी वैश्विक अर्थव्यवस्था में कामयाब होने के लिए तैयार किया जा सकेगा।

जैसे-जैसे हम प्रगति कर रहे हैं, शिक्षकों, संस्थानों और नीति निर्माताओं को एआई और डिजिटल शिक्षा को मुख्यधारा की शिक्षा में सोच-समझकर और समावेशी रूप से एकीकृत करने के लिए मिलकर काम करना होगा। सीईसी में, हम शिक्षण अधिगम को बढ़ाने तथा उभरती प्रौद्योगिकियों का लाभ उठाने के लिए समर्पित हैं। राष्ट्रव्यापी कार्यशाला और सेमिनारों के माध्यम से, हम एआई-सक्षम उपकरणों के बारे में जागरूकता प्रसार और शिक्षण पद्धति में नवाचार प्रोत्साहन से संकाय विकास को प्रोत्साहन दे रहे हैं। हमारा उद्देश्य शिक्षकों के सशक्तिकरण और भारत के भविष्य को आकार देने के लिए तैयार शिक्षार्थियों की एक पीढ़ी को प्रेरित करना है।

हम सब एक साथ मिलकर एक परिवर्तनकारी यात्रा के अहम् दौर में हैं, जो शिक्षा को नया आयाम प्रदान करेगी, और हमारे राष्ट्र की पूर्ण क्षमता को सामने लाएगी।

Dear Readers,

Artificial Intelligence (AI) and digital education are ushering in a new era in India's educational landscape, transforming how knowledge is delivered, accessed, and experienced. These advancements are unlocking unprecedented opportunities for both learners and educators. AI, in particular, is revolutionising personalised learning, allowing students to engage with content at their own pace, guided by adaptive algorithms that respond to individual learning needs.

In a country as vast and diverse as India, such technology holds the potential to bridge longstanding educational gaps. By offering tailored learning experiences and scalable digital solutions, AI is helping ensure that students from all socio-economic backgrounds, including those in remote and underserved regions, have access to quality education. What once seemed impossible is now within reach: a more equitable, inclusive, and dynamic learning environment for all. Beyond access, these tools also promote essential 21st-century skills such as creativity, critical thinking, and technological literacy, preparing India's youth to thrive in an increasingly competitive global economy.

As we move forward, educators, institutions, and policymakers must work together to integrate AI and digital learning into mainstream education thoughtfully and inclusively. At CEC, we are dedicated to leveraging emerging technologies to enhance learning outcomes. Through nationwide workshops and seminars, we support faculty development by raising awareness of AI-enabled tools and encouraging innovation in teaching practices. Our mission is to empower educators and inspire a generation of learners ready to shape the future of India.

Together, we stand at the threshold of a transformative journey, one that reimagines education and unlocks the full potential of our nation.

Jai Hind!

FROM AIRWAVES TO ONLINE PLATFORMS: THE EVOLUTION OF LEARNING THROUGH RADIO AND SWAYAM

The trajectory of educational communication in India traces a compelling arc—from the humble beginnings of radio broadcasts to the sophisticated, interactive online platforms of today. The shift from audio-centric pedagogical tools to multimedia-enriched Massive Open Online Courses (MOOCs) encapsulates not merely technological advancement but also an evolving philosophy of inclusive and accessible education. Radio, once a revolutionary medium for mass instruction, laid the groundwork for a national discourse on educational equity. In the contemporary digital ecosystem, platforms like SWAYAM (Study Webs of Active Learning for Young Aspiring Minds), launched by the Government of India, have emerged as powerful instruments for democratizing education across socio-economic divides. This article examines the historical evolution of educational delivery mechanisms in India, focusing on radio and SWAYAM, and analyses how these mediums have transformed the learner experience, access, and pedagogy.

Radio as the Early Medium of Educational Outreach
Radio education in India finds its roots in the colo-

nial period, with the establishment of the Indian Broadcasting Company in the 1920s. However, it was post-independence that radio assumed a critical role in developmental and educational communication. The **Educational Radio Project (1956)**, jointly launched by All India Radio and the Ministry of Education, sought to supplement classroom teaching, especially in rural and underserved areas.

The medium's strength lay in its wide reach and low cost. Landmark initiatives like **School Broadcasts** and **Farm Radio Programmes** during the 1960s and

Top 5 Digital Education Initiatives by Government of India | 2025

1970s showcased the versatility of radio in delivering subject-specific content and functional knowledge. The **Satellite Instructional Television Experiment (SITE)** of 1975-76, although based on television, was conceptually rooted in earlier radio education efforts and further validated the role of mass media in rural education.

Radio's pedagogical appeal resided in its capacity for immediacy, repetition, and linguistic adaptability. According to **Yadava and Reddy (1988)**, educational radio in India contributed significantly to teacher training, adult literacy, and agricultural extension programs. Despite its one-way communication model, the structured nature of radio broadcasts provided a sense of continuity and engagement for learners without formal educational access.

The Shift Towards Digital: Genesis of SWAYAM

As India entered the digital era, the limitations of radio, primarily its unidirectional nature and lack of learner interactivity, necessitated a paradigm shift. The National Knowledge Commission (2005-2009) and subsequent policy recommendations underlined the need for ICT-based learning. The launch of **SWAYAM in 2017** marked a pivotal point in India's education system, aligning with the Digital India initiative and National Education Policy (NEP) 2020.

SWAYAM was designed as a comprehensive platform offering MOOCs in diverse disciplines, available in

multiple languages and developed by India's premier institutions such as IITs, IIMs, IGNOU, and Central Universities. The platform integrates video lectures, downloadable readings, self-assessment tests, and discussion forums, facilitating a blended and learner-centric pedagogical approach. Unlike traditional radio, SWAYAM enables asynchronous learning, self-pacing, and continuous feedback, making it suitable for both lifelong learners and formal degree seekers.

According to the **MoE (2020)**, more than 2,000 courses have been hosted on SWAYAM, with over 10 million learners enrolled. Its credibility is further enhanced by the UGC's approval of credit transfer for up to 40% of a student's coursework via SWAYAM MOOCs. The platform thereby bridges the gap between distance and formal education, allowing students in Tier 2 and Tier 3 cities to access high-quality content from India's best faculty.

Continuity and Transformation in Educational Communication

The evolution of educational media in India demonstrates the persistence of foundational goals such as universal access, social equity, and pedagogical innovation. Educational radio, with its auditory immediacy and widespread availability, was a pioneering effort in taking education beyond the conventional classroom, reaching remote rural areas and connecting with the linguistically diverse Indian population.

This emphasis on accessibility and contextual relevance continues in digital learning ecosystems like SWAYAM, which leverages the internet and multimedia tools to reach an even broader demographic base.

SWAYAM transforms the learning experience from passive listening to active engagement, incorporating formative assessments, quizzes, certification modules, and peer-reviewed assignments that place the learner at the centre of the educational process. This interactivity is crucial for deep learning and promotes self-regulated learning behaviours. The platform's capacity for asynchronous learning allows learners to set their own pace, revisit content, and engage with instructors and peers through discussion forums, creating a dynamic learning environment absent in traditional broadcast media.

The pedagogical continuity of digital platforms is evident in the way SWAYAM curates content, offering courses in multiple Indian languages, enabling linguistic inclusivity and contextualising content to reflect local realities. The National Education Policy (NEP) 2020 reinforces the centrality of inclusive and flexible learning systems, advocating for digital platforms, open educational resources, and blended models of instruction.

In terms of technological transformation, SWAYAM marks a departure from the linear, non-interactive logic of radio broadcasts, incorporating features such as Artificial Intelligence (AI), learner analytics, and interactive tools that personalise the educational journey. However, this transformation is not absolute; it builds upon the foundational ethos of earlier media initiatives. The movement from airwaves to online platforms is not only a technological transition but a profound pedagogical and ideological one, representing both continuity and change in inclusive educational outreach. As educational ecosystems

become increasingly hybrid, drawing on both traditional and new media, the legacy of educational radio continues to shape the future of online learning platforms like SWAYAM, ensuring that the mission of accessible and high-quality education for all remains an achievable goal.

Challenges and the Road Ahead

Despite SWAYAM's innovative potential, it is not devoid of challenges. Digital literacy, internet penetration, and language diversity remain pressing concerns. A UNESCO (2021) report on the digital divide during the pandemic highlighted that over 50% of rural Indian households lack access to the internet, thus undermining the platform's outreach in exactly the regions where radio once thrived.

The learner engagement on MOOCs often sees high drop-out rates. The absence of real-time human interaction, cognitive overload, and lack of peer accountability are cited as primary reasons (Jordan, 2015). SWAYAM must thus adopt a more learner-analytics-driven approach, integrating adaptive learning systems and mentorship models to personalise the learning experience.

Nonetheless, the comparative flexibility, scalability, and resource-rich environment of SWAYAM make it a resilient platform in India's educational future. Blending its offerings with traditional radio or community radio networks could also revive the hybrid model of outreach, leveraging the strengths of both old and new media.

The transition from airwaves to online platforms encapsulates India's educational journey from scarcity to possibility. Radio, with its wide footprint and cultural familiarity, played a foundational role in shaping early educational dissemination. SWAYAM, in contrast, represents a technologically enriched, policy-driven model of education that embodies the aspirations of Digital India and NEP 2020.

Yet, the continuum between the two is undeniable. Both media function as enablers of access, participation, and transformation. As India stands at the cusp of an educational renaissance, the lessons from radio's past and the innovations of SWAYAM's present must be synthesised to ensure a holistic, inclusive, and future-ready learning ecosystem.

Excerpt from the Lecture

An alternative to a carbon tax is a system of tradable carbon permits, also called cap-and-trade. CAP AND TRADE is a tradable permit system for pollution emissions. A carbon trading scheme can be implemented at the state or national level or could include multiple countries. The lecture demonstrates each firm's optimal emissions and the equilibrium price of permits. The lecture would delve into the advantages of tradable permits. The carbon credit market is a system where entities can buy and sell emission reduction credits, or carbon credits, to offset their greenhouse gas emissions. The two types of markets such as Compliance Markets and Voluntary Markets. The lecture would also navigate through the challenges associated with Carbon Credit Markets.

Learning Objectives

- To comprehend the framework of tradable permits as an economic incentive under the Environmental Regulation.
- To understand the “cap and trade” concept of the marketable permit system.
- To visualize the market equilibrium achieved under the marketable permit system
- To comprehend the carbon credit markets and their functioning.
- To visualize the advantages and challenges related to the carbon credit market system.
