

## FAQ's

### **1. Discuss the analysis of truss by method of joints?**

- Each joint in a truss is considered as a separate freebody in equilibrium
- Unknown forces are determined using equations of equilibrium namely  $\sum v = 0$  and  $\sum h = 0$
- Joints considered as free body should be such that it should not have more than 2 unknown forces

### **2. What is cantilever truss?**

If any one of the members of the truss is fixed and the other end is free, and the other end is free, it is called a cantilever truss. There is no reaction force at the fixed end.

### **3. What are the hints to be followed while analyzing a cantilever truss using method of joints?**

- There is no need to find the support reactions.
- All the members are assumed to be tensile.
- Consider tensile forces as positive and compressive as negative.
- The force convention is, upward force assigns positive sign and downward force assigns negative sign.
- The analysis is to be started from the free end where there is maximum of two unknown forces, using the condition of  $\sum v = 0$  and  $\sum h = 0$ .

### **4. The cantilever truss in the given Fig is hinged at D and E. Find the force in each member**

Figure P-406

#### **At Joint A**

$$\sum F_V = 0 \quad \sum F_H = 0$$

$$F_{AB} \sin 30^\circ = 1000$$

$$F_{AB} = 2000 \text{ N } F_{AB} = 2000 \text{ N tension}$$

$$\Sigma F_H = 0 \quad \Sigma F_H = 0$$

$$F_{AC} = F_{AB} \cos 30^\circ \quad F_{AC} = F_{AB} \cos 30^\circ$$

$$F_{AC} = 2000 \cos 30^\circ \quad F_{AC} = 2000 \cos 30^\circ$$

$$F_{AC} = 1732.05 \text{ N } F_{AC} = 1732.05 \text{ N compression}$$

**FBD of Joint B**

### **At Joint B**

$$\Sigma F_y = 0 \quad \Sigma F_y = 0$$

$$F_{BC} = 1000 \cos 30^\circ \quad F_{BC} = 1000 \cos 30^\circ$$

$$F_{BC} = 866.02 \text{ N } F_{BC} = 866.02 \text{ N compression}$$

$$\Sigma F_x = 0 \quad \Sigma F_x = 0$$

$$F_{BD} = 1000 \sin 30^\circ + 2000 \quad F_{BD} = 1000 \sin 30^\circ + 2000$$

$$F_{BD} = 2500\text{N} \quad F_{BD} = 2500\text{N} \quad \text{tension}$$

### At Joint C

$$\Sigma F_V = 0 \quad \Sigma F_V = 0$$

$$F_{CD} \sin 60^\circ = 866.02 \sin 60^\circ + 1000 \quad F_{CD} \sin 60^\circ = 866.02 \sin 60^\circ + 1000$$

$$F_{CD} = 2020.72\text{N} \quad F_{CD} = 2020.72\text{N} \quad \text{tension}$$

$$\Sigma F_H = 0 \quad \Sigma F_H = 0$$

$$F_{CE} = F_{CD} \cos 60^\circ + 866.02 \cos 60^\circ + 1732.05 \quad F_{CE} = F_{CD} \cos 60^\circ + 866.02 \cos 60^\circ + 1732.05$$

$$F_{CE} = 2020.72 \cos 60^\circ + 866.02 \cos 60^\circ + 1732.05 \quad F_{CE} = 2020.72 \cos 60^\circ + 866.02 \cos 60^\circ + 1732.05$$

$$F_{CE} = 3175.42\text{N} \quad F_{CE} = 3175.42\text{N} \quad \text{compression}$$

### Result :

AB = 2000 N tension

AC = 1732.05 N compression

BC = 866.02 N compression

BD = 2500 N tension

CD = 2020.72 N tension

CE = 3175.42 N compression
