

GLOSSARY

ROAD:

A wide way leading from one place to another, especially one with a specially prepared surface which vehicles can use.

ROUNDABOUT:

A **roundabout** is a type of circular intersection or junction in which road traffic flows almost continuously in one direction around a central island.

PARKING:

Parking is the act of stopping and disengaging a vehicle and leaving it unoccupied. Parking on one or both sides of a road is often permitted, though sometimes with restrictions. Some buildings have parking facilities for use of the buildings' users. Countries and local governments have rules for design and use of parking spaces.

CIRCULATION PLAN:

A **circulation plan** is a schematic empirical projection/model of how pedestrians and/or vehicles flow through a given area, like, for example, a neighborhood or a Central Business District (CBD). Circulation plans are used by city planners and other officials to manage and monitor traffic and pedestrian patterns in such a way that they might discover how to make future improvements to the system.

PARALLEL AND ANGLE PARKING. ANGLE:

Where **angle parking** is required, vehicles shall stand at an **angle** of about forty-five degrees (45°) to the curb and with the right front wheel touching or within one foot of the curb and shall not be **parked** nearer to each other than one foot.
