FAQs

1. Define design. Explain the definition.

Design is the creation of a plan or convention for the construction of an object, system or measurable human interaction.

Creation = making, from scratch, beginning something into existence, forming, putting together, setting up, construction, erection.

Plan = detailed proposal for doing / achieving something; scheme, idea, game plan, proposal, suggestion, recipe, agenda, map.

Convention = way in which something is usually done; habit, norm, custom, practice, way, arrangement, protocol, pact.

Construction = action of building something, build, erect, establish, manufacture, fabricate, form, fashion, make.

Object = anything that can be seen and touched, thing, article, item, piece, gadget, entity, etc.

System = set of things working together as parts of a mechanism, interconnecting network, a complex whole, structure, order.
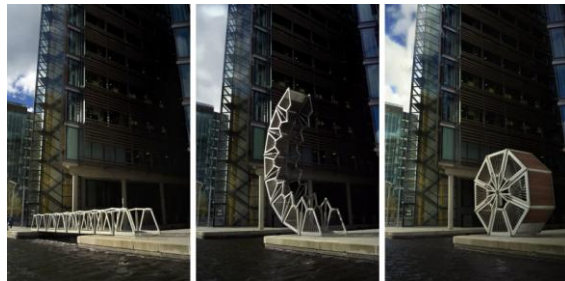

Measurable human interaction as in architectural blueprints, engineering drawings, business processes, circuit diagrams, sewing pattern, products, etc.

2. What are the fields of design?

- Army design
- Applied arts
- Architecture
- Automotive design
- Biological design
- Collaboration design
- Communication design
- Configuration design
- Design management
- Engineering design
- Enviro graphic design
- Fashion design
- Game design
- Sound design
- Spatial design
- Systems architecture
- Graphic design
- Information architecture
- Information design
- Industrial design
- Instructional design
- Interaction design
- Interior design
- Landscape architecture
- Lighting design
- Modular design
- Motion graphic design
- Organization design
- Product design
- Process design
- Service design
- Software design
- Systems design
- Systems modeling
- Transition design

- Urban design
- UI design
- Visual design
- Web design

3. Explain design with a few interesting examples.
