

## **SUMMARY**

In this session we learn about the previous 2 examples were insufficient for us to understand the complex beauty of the architect Sir Norman Foster, we learn about 2 new projects in this session, Stansted Airport, London and Renault Distribution Center, UK.

Both really great structures created a record and showed us how that typology of building can be revolutionized just by a few really impressive design decisions. You shall also marvel about the long span structures and the way structure and services are exposed in Foster's design.
