SUMMARY

In this session we learn about the High-tech architecture is an architectural style that emerged in the 1970s, incorporating elements of high-tech industry and technology into building design. It is important for you to understand this style in this subject because this is one of those styles that consciously sported and celebrated structural genius.

Richard Rogers was another genius of an architect whom we cannot miss when we are studying structure and architecture. Inmos factory was a place where Rogers made a clear architecture victory which delineate the clean areas from the dirty area of the factory.
