GLOSSARY

Activity - An activity is a part of the project denoted by an arrow on the network. The tail of the arrow indicates the start of the activity whereas the head indicates the end of the activity.

Event – Event is the stage or point where all previous jobs merging in it, are completed and jobs bursting out, are still to be completed.

Predecessor activity: the activity which immediately comes before another activity without any intervening activity.

Successor activity: the activity which follows another activity without any intervening activities.

Concurrent activity: Activities that can be carried out concurrently with another activity.

Dummy Activity: It's a hypothetical activity and doesn't consume any kind of resource. It is represented by dotted lines and is inserted in network to clarify activity pattern.

Network is defined as a diagram representing the activities and events of a project, their sequence and inters relationships.
