

GLOSSARY

Estimating -

Estimating is the process of finding an estimate, or approximation of the construction, which is the value that is usable for some purpose even if the input value is uncertain.

Business Promoter/Client -

Also called the client, he is the potential owner of the construction facility.

Productivity -

Productivity is defined as a total output per unit of a total input.

Output -

In construction, the output is usually expressed in weight, length of volume and the input resource is usually in cost of labor or man hours.
