

## **GLOSSARY**

### **Sustainability according to Brundtland Commission, 1987**

Sustainability is meeting “the needs of the present without compromising the ability of future generations to meet their own needs” (UN World Commission on Environment & Development: Brundtland Commission, 1987)

### **Aspects of Sustainable Development**

Sustainable development is more than just about the environment, or generating money through economic growth. It is the intersection of three pillars: Environment, Economy and Society.
