

Course Name: Bachelors of Physical Education

Paper No. - IIIrd

Year : IInd (Part - I)

Topic : Use of audio visual aids

Topic No : Section - D

Paper Name : Methods of Physical Education

Lecture No : 17

Title : Audio Visual Aids - I

Summary

Audiovisual education or multimedia-based education (MBE) is instruction where particular attention is paid to the audio and visual presentation of the material with the goal of improving comprehension and retention. Children learn best by observing and copying the behaviors of adults. It is therefore evident that learning is more effective when sensory experiences are stimulated. These include pictures, slides, radios, videos and other audiovisual tools. According to the Webster dictionary, audio-visual aids is defined as training or educational materials directed at both the senses of hearing and the sense of sight, films, recordings, photographs, etc. used in classroom instructions, library collections or the likes.
