

## **SUMMARY**

Teaching aid is an important teaching learning material. It is broadly classified as audio aids, visual, audio- visual aids and activity aids. They are supplementary devices which serves as a stimuli for learning 'why', 'how', 'when', and 'where' of the concept of study. In the present technological age, the full potential of teaching aids needs to be explored by the teacher for more effective teaching. This lesson describe a few teaching aids and suggest ways for its effective implementation to enable the teacher to take right decision in choosing the appropriate teaching aids for imparting a particular lesson such that teaching aids will render great help in enabling the teachers to achieve the instructional objectives.
