

FAQs

Q1. What do you mean by sports management?

Ans : Sport Management is a management of those organizations whose major domain of operation is sport and physical activity.

Q2. What is student's preparation?

Ans : The students must be properly dressed for physical education classes. In the present school education system the students have a uniform which is not suitable to activity classes. But a complete change of dress in the school may not be possible as it is done in the western countries for physical education classes

Q3. What is attendance system?

Ans : Attendance of students in physical education classes should be taken for maintaining regularity in the classes. The attendance system should be accurate and quick. There are five methods of taking attendance out of which the teacher should select the best one which is suitable to the occasion.

Q4. What are the methods of Attendance system?

Ans : The methods of Attendance System are:

Attendance by the class leader/monitor

Calling roll number by the teacher :

Calling names by the teacher

Students calling out their roll numbers in turn

Self checking system/checking by observation

Q5. Why does teacher need more time to instruct their students?

Ans : The teachers need more time to instruct their students. Because of "No Child Left Behind, activities like Teacher Advisory classes serving only the lowest ten percent of the students have become the focus .

Q6. What is the role of homework?

Ans : The home work should be relevant and meaningful. Even though having a part-time job teaches responsibility, keep the hours low so the student can invest enough time on his academic career. Athletics also should be limited to an hour after school to enable the student to complete his academic studies

Q7. Explain how a class can be controlled?

Ans : Every class has to be controlled and kept quiet for proper and effective teaching and learning. Assemble the class at most suitable place and teach by demonstration and explanation. The teacher must use suitable audio-visual teaching aids. He should simplify the topic or the skill so that students can understand and learn easily. The teacher should always make use of simple and proper language for both theory and practical classes.

Q8. Mention any one rule to handle a difficult student.

Ans : Don't lecture, scold, or yell: Lecturing, scolding, and yelling will cause all students to dislike us, but when we direct our diatribe toward one particular student, it can be especially damaging. Creating friction between us and our most challenging students virtually guarantees that their behaviour will worsen.

Q9. Explain one method of Attendance system ?

Ans : Students calling out their roll numbers in turn :This method is very quick. The teacher notes down the roll numbers who does not speak out and next roll numbers starts from there. However, for using this system the roll numbers should be in sequence and there should not be missing roll numbers in between
