

Glossary

Co-morbid: Co-morbid is the presence of one or more additional diseases or disorders co-occurring with (that is, concomitant or concurrent with) a primary disease or disorder

Frailty: The condition of being weak and delicate.

Glycaemia: The presence of glucose in the blood.

Osteoporosis: A medical condition in which the bones become brittle and fragile from loss of tissue, typically as a result of hormonal changes, or deficiency of calcium or vitamin D.

Ischemic: It is a restriction in blood supply to tissues, causing a shortage of oxygen and glucose needed for cellular metabolism

Hypoglycemia: Deficiency of glucose in the bloodstream.
