

## **PHYSICAL EDUCATION**

Subject : Physical Education

Semester : 4<sup>th</sup>

Paper No. and Title : (401) Test, Measurement and Evaluation in Physical Education

### **Unit-4: Measures of Dispersion**

**Summary:** Among the above measures of dispersion, the standard deviation is the most important and widely used measure of dispersion. It is free from those defects from which other measure suffer. It is the only measure of dispersion suitable for mathematical treatment. It is not much affected by sampling fluctuations. So, the standard deviation is the best measure of dispersion.
