Inflation and Unemployment

Subject:	Business Economics
Course:	B. A. (Hons.), 3 rd Semester, Undergraduate
Paper No. & Title:	Paper – 301 Macroeconomics - I
Unit No. & Title:	Unit – 4 Inflation, Unemployment and The Phillips Curve
Lecture No. & Title:	Lecture – 1 Inflation and Unemployment

Glossary

Cost-push inflation

This type of inflation emanates from changes which arise on the side of supply or cost of production, independently of any excess demand in both final goods and factor markets.

Demand-pull Inflation

The demand pull inflation is concerned with the basic factor at work which in turn brings shift in AD for output either from the government or the entrepreneurs or the households.

Inflation

Rise in general price level.

Unemployment

Represents the unused labour force within an economy.

Wage Push

The market power of factor inputs is increased when resources are fully employed. Thus due to pressure on supply, the wage price increases which in turn hike the cost of production, this push in wage price is a type of cost push inflation.
