[Summary]

[Econometric Problem Solving using SPSS Software]

Subject:	Business Economics
Course:	B. A. (Hons.), 5th Semester, Undergraduate
Paper No. & Title:	Paper – 502 Computational Techniques for Business Economics
Unit No. & Title:	Unit – 3 Econometric Problem Solving
Lecture No. & Title:	Lecture – 1 Econometric Problem Solving using SPSS Software

Summary:

In SPSS software we can easily perform, all the aspects of econometrics. First of all we have seen how to entre the data, then how to carry out the test for single mean, two mean, two variables. Next we have seen how to develop a general linear regression model with the help of number of independent variables and dependent variables. We have also see, which independent variables has a significant effect on dependent variable.

Thank You.
