

### Summery

The chapter on milling technology – rice milling, deals with the methods of milling used for the conversion of paddy to rice. The chapter deals with Paddy harvesting, threshing and handling, Traditional rice milling machinery, Modern Rice Milling and Modern milling control technologies. The major reason of separating the milling of rice from that of wheat and maize is in rice the consumers require the whole rice and not flour. The major steps of rice milling are Cleaning, Dehusking, Husk separation, Paddy separation, Polishing, Grading and Sorting. The chapter also deals with the tradition and modern methods of rice milling.
