

## OBJECTIVE

In this episode, we learnt about;

Define the term pasta.

Explain the manufacturing process of pasta.

Identify a variety of pasta shapes.

Macaroni is a tubular Italian pasta used to be made by wrapping pasta dough around knitting needles. The term now refers to any small tubular pasta, all of which go well with chunky sauces.

How to Preserve pasta?

Durum wheat or macaroni wheat

Different shapes of pasta

Storage methods

Popularity of pasta.

What countries are the leading pasta producers?
