

ASSIGNMENT

- 1.Milling of difficult-to-mill pulses
- 2.F Milling of easy-to-mill pulses
- 3.Effect of different types of fats on Cholesterol levels
- 4.Machineries used to harvest pulses
- 5.Different types of threshers used in threshing of pulses
- 6.Natural Vs artificial drying of pulses
- 7.Home scale milling of pulses
- 8.Cottage scale milling of pulses
- 9.Equipments used in pitting of pulses
- 10.Machineries used in Dehusking and splitting of pulses
- 11.Different types of Pulse polishing
- 12.Schematical representation of CFTRI milling machinery
- 13.CIAE modern process for milling of pulses
- 14.Modern milling process using enzyme
- 15.Chemical treatment for milling of pulses
