

OBJECTIVE

- 1.What is steady state and unsteady state heat transfer?
- 2.Equation for conductive heat transfer in rectangular slab and tubular pipe?
- 3.What is thermal resistance?
- 4.Conduction of heat in multilayered systems?
- 5.How to estimate convective heat transfer coefficient?
- 6.What is forced and free convection?
- 7.How to estimate overall heat transfer coefficient?
- 8.What is LMTD
